

## PUZZLES

1. Element used in integrated circuits.
2. Certain integrated circuits.
3. Component of all integrated circuits.
4. Thin slice of a semiconductor material, typically silicon, used as a base for manufacturing integrated circuits.
5. Principles for laying out GPU's integrated circuits?
6. In computing, a group of integrated circuits that manages data transfer between the CPU, memory and other peripherals.
7. Application Specific Integrated Circuit.
8. Principle of the complex integrated circuit.
9. Aircraft safety system does without integrated circuit.
10. Gold electronic component, cut down integrated circuit, capturing second recording.
