

SNS COLLEGE OF ENGINEERING

Kurumbapalayam (Po), Coimbatore – 641 107

An Autonomous Institution

Accredited by NAAC – UGC with 'A' Grade

Approved by AICTE, New Delhi & Affiliated to Anna University, Chennai

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

COURSE NAME : 19CS508 - BIG DATA ANALYTICS

III YEAR / V SEMESTER

Unit 3- ASSOCIATION AND RECOMMENDATION SYSTEM

Topic 6 : Hybrid Recommendation

Hybrid Recommendation

A hybrid recommendation the framework uses a combination of content-based recommendation system(CBRS) and collaborative filtering recommendation systems (CFRS) to achieve precisely performance by reducing the drawbacks of the conventional recommendation techniques (Adomavicius and Tuzhilin, 2005). User's side-information, comments, scores, connections, attributes and reviews are used along with the rating matrix in the hybrid recommendation system to enhance performance and precision

Cont..

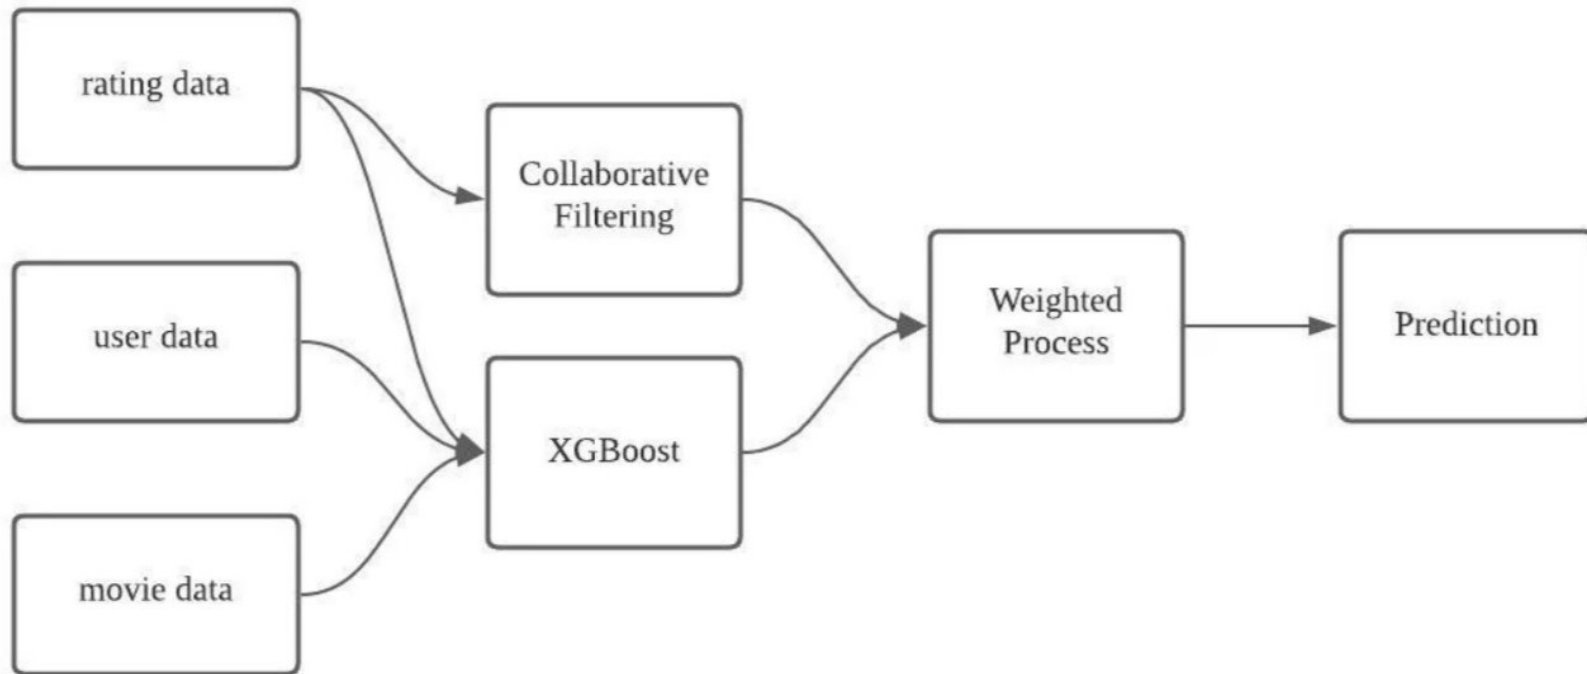

Hybrid Recommender Systems: Survey and Experiments, Burke classified the hybrid recommender system into 7 approaches in building the hybrid recommender system

- 1. Weighted**
- 2. Switching**
- 3. Mixed**
- 4. Feature Combination**
- 5. Feature Augmentation**
- 6. Cascade**
- 7. Meta-Level**

Cont..

contributing model as the input to the main recommendation model.

Cont..

What do Hybrid Recommender Systems do?

- Hybrid Recommender Systems are used for providing recommendations to users based on their preferences and behaviors. They can be used for a variety of applications, including:
- Product recommendations: Hybrid Recommender Systems can be used to recommend products to users based on their purchase history, browsing behavior, and other factors.
- Music recommendations: Hybrid Recommender Systems can be used to recommend music to users based on their listening history, likes and dislikes, and other factors.
- Movie recommendations: Hybrid Recommender Systems can be used to recommend movies to users based on their viewing history, ratings, and other factors.

Activity

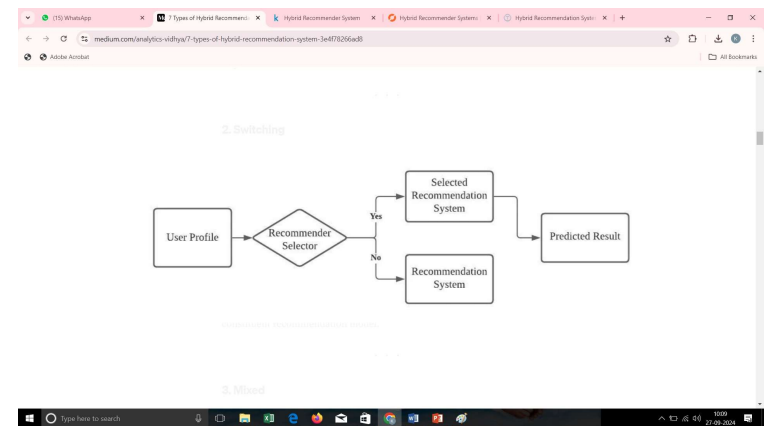

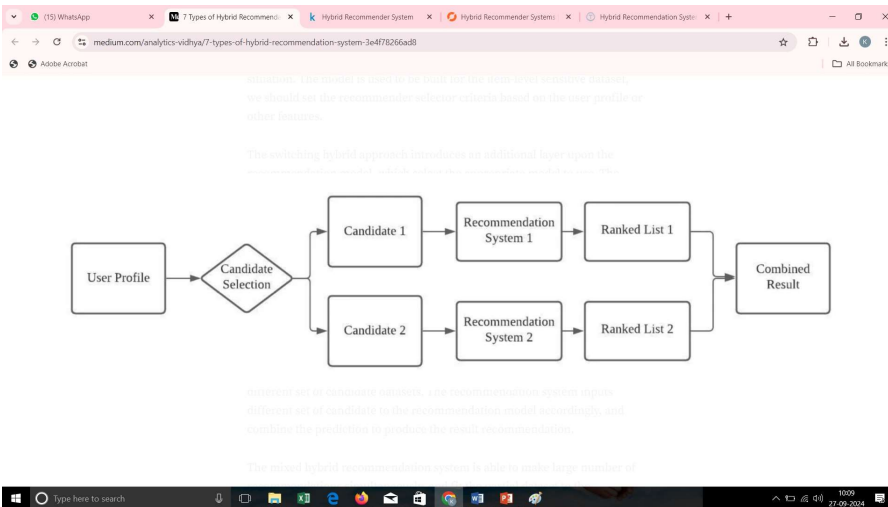

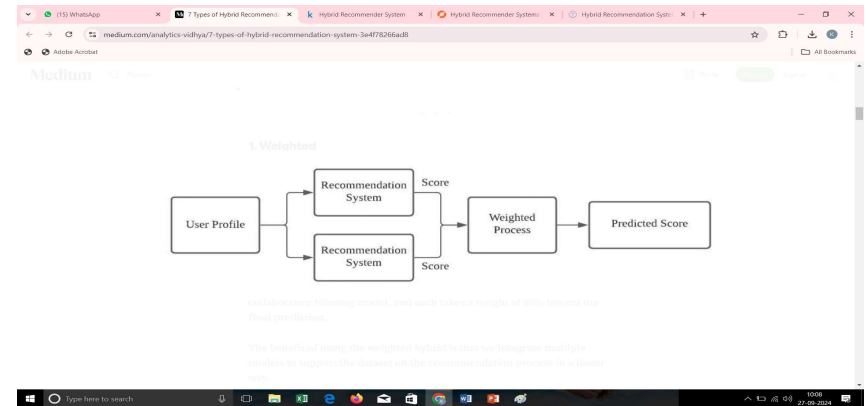

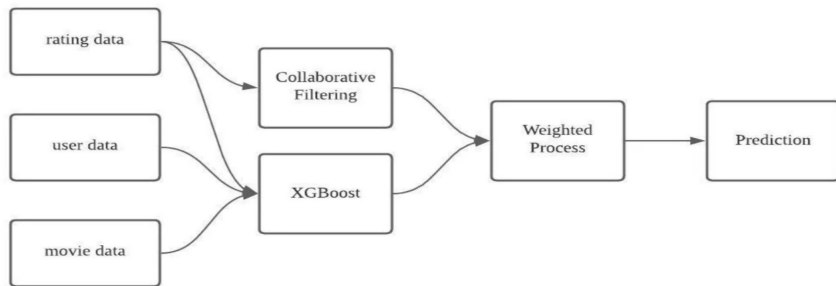

- **Advantages of hybrid Recommendation**

- increased accuracy: Hybrid Recommender Systems can provide more accurate recommendations by combining the strengths of different recommender systems.
- Increased diversity: Hybrid Recommender Systems can provide more diverse recommendations by combining recommendations from different systems.
- Robustness: Hybrid Recommender Systems can be more robust to cold-start problems, where there is not enough data on new users or new items.

Disadvantages of hybrid Recommendation

- High computational complexity and large database of ratings.

Assessment 1

1. List out the advantages of hybrid Recommendation

- a) _____
- b) _____
- c) _____
- d) _____

•Identify the disadvantages of hybrid Recommendation

- a) _____
- b) _____
- c) _____
- d) _____
