

SNS COLLEGE OF ENGINEERING

Kurumbapalayam (Po), Coimbatore – 641 107

An Autonomous Institution

Accredited by NBA – AICTE and Accredited by NAAC – UGC with 'A' Grade

Approved by AICTE, New Delhi & Affiliated to Anna University, Chennai

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

COURSE NAME : 23ITT101- PROBLEM SOLVING & C PROGRAMMING

I YEAR /I SEMESTER

Unit 3- C-ARRAYS AND STRINGS

Topic : Arrays – Characteristics, Initialization – Declaration

Array

It is a collection of elements of same data type, that are referenced by a common name

Types

- One-Dimensional array
- Two-Dimensional array
- Multi-Dimensional array

One-Dimensional array Array Declaration

Syntax:

datatype array_name[size];

Example: int x[3];

Array initialization

Syntax:

data_type array_name[size]={variables};

Example: *int x[3]={5,3,7};*

X	
5	X[0]
3	X[1]
7	X[2]

```
int a[5];  
a[0]=10;  
a[1]=20;  
a[2]=30;  
a[3]=40;  
a[4]=50;
```

```
int a[5]={10,20,30,40,50};
```

```
char a[7]="welcome";
```

//program to set values of array and display it

```
#include<stdio.h>
#include<conio.h>
void main()
{
    int a[5],i;
    clrscr();
    a[0]=10;
    a[1]=20;
    a[2]=30;
    a[3]=40;
    a[4]=50;
    for(i=0;i<5;i++)
    {
        printf("\nThe value in a[%d] is %d",i,a[i]);
    }
    getch();
}
```

OUTPUT

```
The value in a[0] is 10
The value in a[1] is 20
The value in a[2] is 30
The value in a[3] is 40
The value in a[4] is 50
```

//program to get values of array from users and display it

```
#include<stdio.h>
#include<conio.h>
void main()
{
    int a[5],i;
    clrscr();
    printf("Enter five values : \n");
    for(i=0;i<5;i++)
    {
        scanf("%d",&a[i]);
    }
    for(i=0;i<5;i++)
    {
        printf("\nThe value in a[%d] is %d",i,a[i]);
    }
    getch();
}
```

OUTPUT

Enter five values :

10

20

30

40

50

The value in a[0] is 10

The value in a[1] is 20

The value in a[2] is 30

The value in a[3] is 40

The value in a[4] is 50

Thank You
