

Strategic Control

- ”Strategic control is “the critical evaluation of plans, activities, and results, thereby providing information for the future action”. There are four types of strategic control: premise control, implementation control, strategic surveillance and special alert control.
- **Measurement in Performance :**

Performance measurement is the process used to assess the efficiency and effectiveness of projects, programs and initiatives. It is a systematic approach to collecting, analyzing and evaluating how “on track” a project/program is to achieve its desired outcomes, goals and objectives.
